

Time Tracking

Fewer Errors

Intelligent clock technology helps eliminate duplicate or missed punches and errors computing total hours and pay.

Clock Lockout

Limit early clock in, scheduling warns when overtime approaches, managers easily view time cards in real time.

Eliminate Unplanned Overtime

Restrict unplanned overtime with rules and alerts. Compare budgeted hours to actual worked time in real time.

Flexible Configuration

Customized pay rules, overtime calculations, compliance requirements and accrual application. Wide range of physical and online clock options.

Mobile Access

Administrators and employees have convenient access to mobile punch clocks and administration tools from any mobile device.

Faster Payroll Processing

Fewer errors, instant access for time card review and export to payroll reduces time spent processing payroll.

TimeWorksPlus.

TimeWorksPlus simplifies time tracking so you can reduce payroll costs, process payroll faster and eliminate errors. Track and manage punches, time cards, time-off requests and accruals. Seamlessly integrates with payroll services.

TimeWorksPlus Features

- ✓ **Timekeeping** - Captures time data from clocks, calculate multiple rates, accruals, and keeps audit trail.
- ✓ **Geofencing** - Makes it easy to see who showed up at the right place and when. Unlimited geofences allows you to track every location. Mobile clocks simplify compliance.
- ✓ **Filtered Clock Prompts** - Filter clock prompts by employee or group to reduce punch choice, save time and reduce errors.
- ✓ **Overtime Management** - Auto-apply overtime or proactively alert as thresholds approach. Flexible calculations and application.
- ✓ **Payroll Integration** - Easy time card review and approval. Connects time data to payroll processing for fewer errors and faster completion.
